WE INTRODUCE OURSELVES

Since the company was founded in 2005, we develop and sell floor sockets, retractable supply posts, wall distributors and energy columns for indoor and outdoor use. The priorities are in quality, design and the best price-performance ratio.

In addition to our extensive standard program, we also offer individual processing and custom-made products. Our diverse range of services ensures that your requirements are implemented quickly and efficiently.

The fact that our products are made and manufactured exclusively in Germany can be seen from the elegant design, the high-quality material and the sophisticated workmanship. Robust, tough and weatherproof for outdoors, or discreet and adapted for indoors, our products are always practical and useful.

We only use VDE-certified socket inserts for our products, which you can also obtain from us according to French, Danish, Belgian or Swiss standards.

WITH US, YOU WILL BENEFIT

- With only one order number: One order number for a complete product.
- With ready-to-install products: You receive completely ready-to-install products, whereby the individual parts do not first have to be put together and laboriously assembled.
- With extensive stock goods: Many of our products are already prefabricated and can be delivered within a very short time.
- With a short response time: Ordered goods usually leave the factory on the same day, so that a large part of our deliveries arrive the next day.
- With creative special solutions: you can't find a suitable product that exactly matches your ideas? Let us know your requirements and we will develop affordable special solutions exactly according to your wishes.

2. Offer and Conclusion of contract

The statements made in II. 3. regarding the offer and conclusion of the contract also apply to business customers, but with the following provisos:

- 2.1 The sole decisive factor for the legal relationship between us and the customer is the written purchase contract, including these GTC. This completely reproduces all agreements between the contracting parties regarding the subeatcht matter of the contract. Verbal commitments by BS before conclusion of the contract are legally non-binding and verbal agreements of the contracting parties are replaced by the written contract, unless it is expressly clear from them that they continue to be binding.
- 2.2 Information provided by BS on the subeatcht matter of the delivery / service (eg weights, dimensions, utility values, load capacity, tolerances and technical data) as well as our representations of the same (eg drawings and illustrations) are only approximate unless the usability for the contractually provided purpose presupposes an exact match. They are not guaranteed characteristics, but descriptions or labeling of the delivery / service. Customary deviations and deviations, which occur due to legal regulations or represent technical improvements, as well as the replacement of components by equivalent parts are permissible, as far as they do not affect the usability for the contractually intended purpose.
- 2.3 BS reserves the ownership / copyright of all offers and estimates submitted by it, as well as any drawings, illustrations, calculations, brochures, catalogs, models, tools and other documents and aids provided to the customer. The customer may not make these obeamchcts accessible to third parties without the express consent of BS, as such, or in terms of content, notify them, or use or duplicate them themselves or through third parties. He shall, at the request of BS, return these items in full and destroy any copies made if they are no longer required by him in the ordinary course of business or if negotiations do not lead to the conclusion of a contract. Excluded from this is the storage of electronically provided data for the purpose of conventional data backup.

3. Prices, Price changes

The comments made under II. 7 on prices also apply to business customers, but with the following stipulations / changes:

- 3.1 By way of derogation from II.7.1, in the case of tenders and written offers, net prices are given which are understood to be exclusive of statutory value added tax.
- 3.2 Insofar as the agreed prices are based on the list prices of BS and delivery should take place more than four months after the conclusion of the contract, the list prices of BS valid on delivery shall apply.

4. Payment and delay

The comments made under II. 8 on payment options also apply to business customers, but with the following stipulations / changes / additions:

In addition to those in II.8. business customers can also pay by invoice. The invoice amounts are payable within twenty-one days without any deductions, unless otherwise expressly agreed. Decisive for the date of payment is receipt by us. Payment by check is excluded unless it is agreed separately in individual cases.

If the customer does not pay by the due date, the outstanding amounts shall be subeatcht to interest at a rate of 9 percentage points above the base rate from the due date; the assertion of higher interest and further damages in case of default remains unaffected.

5. Set-off and right of retention

- 5.1 The offsetting of counterclaims of the customer or the retention of payments due to such claims is only permitted if the counterclaims are undisputed or legally binding.
- 5.2 BS shall be entitled to execute or render outstanding deliveries or services only against advance payment or provision of security if, after the conclusion of the contract, it becomes aware of circumstances which are capable of substantially reducing the creditworthiness of the customer and by which the payment of BS's outstanding claims of the customer from the respective contractual relationship (including from other individual orders to which the same framework contract applies) is endangered.

6. Shipping, Collection, Place of fulfillment, passing of risk, Approval

By way of derogation from, or supplementary to II. 9., the following applies to business customers with regard to shipping and collection as well as (additionally) with regard to the place of fulfillment, transfer of risk and approval:

- 6.1 Place of fulfillment for all obligations arising from the contractual relationship are our business premises, unless otherwise specified. We reserve the right to deliver goods from other locations (third-party shops). In these cases, the respective location from which the delivery takes place is the place of fulfillment.
- 6.2 The risk shall pass to the customer at the latest upon the handover of the delivery item (whereby the beginning of the loading process is decisive) to the forwarder, carrier or other third party designated for the execution of the shipment. This also applies if partial deliveries are made or BS has taken on other services (such as shipping). If the shipment or transfer is delayed as a result of a made ofe whose made ofe lies with the customer, the risk passes to the customer from the day on which the delivery item is ready for despatch and BS has notified the customer.
- 6.3 Storage costs after transfer of risk shall be borne by the customer. In the case of storage by BS, the storage costs amount to 0.25 percent of the invoice amount of the delivery items to be stored per completed week. The assertion and proof of further or lower storage costs remains reserved.
- 6.4 Deadlines and dates for deliveries and services provided by BS are only approximate, unless a fixed deadline or a fixed date has been expressly confirmed or agreed. If shipment has been agreed, delivery periods and delivery dates refer to the time of transfer to the forwarder, carrier or other third party commissioned with the transport.
- 6.5 Without prejudice to its rights arising from default by the customer, BS may require the customer to extend delivery and service periods or postpone delivery and service deadlines by the period in which the customer fails to meet its contractual obligations towards BS.
- 6.6 BS shall not be liable for impossibility of delivery or for delays in delivery, as far as these are due to force majeure or other unforeseeable events at the time of the conclusion of the contract (eg breakdowns of all kinds, difficulties in material or energy procurement, delays in transport, strikes, legitimate lockouts, lack of manpower, Energy or raw materials, difficulties in obtaining necessary regulatory approvals, regulatory action or the lack of, incorrect or untimely supplier delivery) that BS is not responsible for. If such events make the delivery or service substantially more difficult or impossible and the hindrance is not only temporary, BS is entitled to withdraw from the contract. In the case of obstacles of a temporary duration, the delivery or service periods shall be extended or the delivery or service dates shall be postponed by the period of the hindrance plus a reasonable start-up period. Insofar as the customer can not reasonably be expected to accept the delivery or service as a result of the delay, he can withdraw from the contract by means of an immediate, written declaration to BS.
- 6.7 In reasonable extent for the customer, we are entitled to partial deliveries. Additional shipping costs are not incurred by the customer through partial deliveries.
- 6.8 If BS is in default with a delivery or service or if it becomes impossible for it to deliver or perform any service for whatever reason, BS's liability for damages is limited in accordance with III. 7.
- 6.9 We will insure the shipment against theft, breakage, transport, fire and water damage or other insurable risks only at the express request of the customer and at his expense.
- 6.10 Insofar as acceptance has to take place, the purchased item shall be deemed accepted if
 - the delivery and, if BS also owes the setting up / installation, the setting up / installation is completed,
 - BS informed the customer with reference to the acceptance fiction according to this III. 6.10 and has asked him to accept,
 - 12 working days have passed since the delivery or setting up / installation or the customer has started to use the purchased goods and in this case six working days have elapsed since delivery or installation
